

writing these from (my poor) memory a week later, please help if you can: -- [SimonDorfman](#) - 08 Jun 2009

- [MarkAnderson](#) had the great idea that we turn the first half hour of the weekly meeting into a show & tell or something hacker-related so we're not just a poli-sci group during all the initial organization stuff. Mark's going to start off next week by telling us about all the cool stuff he's doing
- [BenjaminEckel](#) asked for feedback on the intro to [ArduinoElectronicsClass](#) he's going to teach. [MikePerry](#) offered to host the class at his place. We tried to come up with a date for the class, but didn't reach a conclusion. But Ben & Mike are going to try to come up with a date for the class in the next few days.
- we thought about having another meeting to work on the [ByLaws](#) but didn't make any specific plans...
- what else did we talk about? please add it here for everyone who couldn't make it
